GRANGE HALL ROAD BRIDGE CONSTRUCTION NEWSLETTER # 1

June 14, 2021

Rehabilitation work of the bridge has been ongoing. The project consists of replacing the expansion joints at each end of the bridge, replacing structural steel elements at each end of the bridge, and painting the steel beams.

The subcontractor for the project completed sand blasting and painting the beams on June 10. They will be performing some minor painting as the structural steel diaphragms are replaced.

The contractor will be replacing half of the structural steel diaphragms this week. Once that work is completed, they will be installing the north half of the expansion joints and forming the concrete that installs the expansion joints in place.

Work for the project is expected to be completed in August.

Weekly updates will be posted on the Peoria County Highway Department website. If anyone has any questions or concerns, please contact Mr. Jeff Gilles, Assistant County Engineer at (309) 697-6400 x 127 or via email at jjilles@peoriacounty.org.
